

Applied
Suicide
Intervention
Skills
Training

ASIST helps participants understand the ways personal and societal attitudes affect asking for help and interventions.

Although ASIST is widely used by healthcare providers, participants don't need any prior formal training to attend a workshop and become certified: ASIST is open to anyone 16 years and older.

Interactive group format builds practical skills through information, discussion, and rehearsal.

Join us to learn the Pathway for Assisting Life - Suicide First-Aid begins with YOU!
